What is **Insights Discovery?**

Insights Discovery builds high-performing teams across your organisation by using the power of awareness.

It helps you get the best from your people by improving communication, enhancing productivity and enabling collaboration.

Connects teams
Helps teams collaborate, improve performance & work better together

Develops leaders
Gives leaders the skills to inspire, motivate & engage their teams

Builds culture
Creates an open & positive culture that values individuals

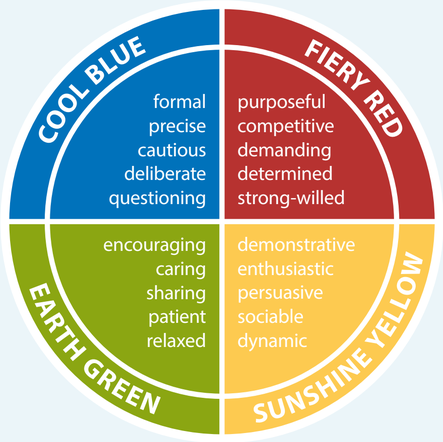

Enables performance
Supports individual & team strengths to help overcome conflict

A practical four-colour model that's easy to learn and simple to apply

Four colour energies, Fiery Red, Sunshine Yellow, Earth Green and Cool Blue, help your people become more aware of their own communication style, behaviours and strengths, and the value they bring to their team.

And it goes deeper, shedding light on team dynamics and employee experiences to help you navigate challenges like change, relationships and engagement.

The colour energies make up a person's unique personality and determine how and why they do the things they do. Based on decades of research, the Insights Discovery personal profile is over 90% accurate.

Discovery Insights®

A gateway to personal, team and leadership development

- A customisable solution that opens a gateway to a whole eco-system of Insights programmes
- A journey of lifelong learning
- A pathway to transforming team culture
- A common language that builds more collaborative ways of working
- A path to high performance and agility
- A scalable learning solution that combines in-person facilitation with digital experiences
- An ongoing partnership

The key to better employee relationships

Most performance-related problems arise from difficult employee relationships. That's why we start with people. Insights Discovery helps your people understand themselves and their colleagues better, enhancing their ability to work together. Through this approach, we've already made a difference to more than 10 million learners in organisations worldwide.
